How to Work with a Grading Schema

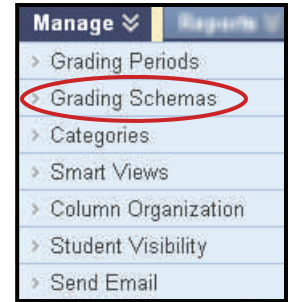

Tips and Tricks

Tip: You can set the grading schema as either the Primary or Secondary Display for any column in the Grade Center.

Tip: Grading Schemas can allow for many different display options beyond a standard letter grade such as Pass/Fail and more.

A Grading Schema is used to associate the points or percentages of a student's grade into some form of letter or text-based score. You can use this to show a student's grade in the common range of A through F as example.

Begin in the Grade Center and go to Manage then Grading Schemas.

Now click on the Action Menu (Chevron) for the existing Letter Grading Schema and choose Edit off the menu.

Now setup the grading schema that suits your needs as described below.

Lower bound for each score option

Text-based score goes here

If you choose to enter grades as the text-based version in the Grade Center, this is the score equivalent

Delete Row will remove excess rows

Arrow will create a new row between existing rows or at the end
